

Prof. Ahmed Hassan Zewail

Professor, Nobel laureate in Chemistry, 1999

Most important awards, prizes and academies

Awards: King Faisal International Prize in Science (1989); First Linus Pauling Chair, Caltech (1990); Wolf Prize in Chemistry (1993); Robert A. Welch Award in Chemistry (1997); Benjamin Franklin Medal, The Franklin Institute, USA (1998); Egypt Postage Stamps, with Portrait (1998); 'The Fourth Pyramid' (1999); Nobel Prize in Chemistry (1999); Order of the Grand Collar of the Nile, Highest Honor of Egypt, conferred by President Mubarak (1999); Ahmed Zewail Fellowships, University of Pennsylvania, USA (2000-); Ahmed Zewail Prize, American University in Cairo (2001-); Postage Stamp, issued by the country of Ghana (2002); Albert Einstein World Award (2006). *Academies:* Ahmed Zewail Center for FemtoScience & Technology, Korea (2002); Fellow, American Physical Society (1982); National Academy of Sciences, USA (1989); Third World Academy of Sciences, Italy (1989); St Catherine's College, Fellow, Oxford, UK (1991); Sigma Xi Society (1992); American Academy of Arts and Sciences (1993); Académie Européenne des Sciences, des Arts et des Lettres, France (1994); American Philosophical Society (1998); Pontifical Academy of Sciences (1999); American Academy of Achievement (1999); Royal Danish Academy of Sciences & Letters (2000); Fellow, American Association for the Advancement of Science, AAAS (2000); Honorary Fellow, Chemical Society of India (2001); Indian Academy of Sciences, Bangalore, India (2001); Foreign Member, Royal Society of London, UK (2001); Honorary Fellow, Sydney Sussex College, Cambridge, UK (2002); Foreign Fellow, Indian National

Science Academy, New Delhi, India (2002); Honorary Foreign Member, Korean Academy of Science and Technology (2002); Honorary Fellow, African Academy of Sciences, Nairobi, Kenya (2002); Honorary Fellow, Royal Society of Chemistry, UK (2003); Foreign Member, Russian Academy of Sciences (2003); Foreign Member, Royal Swedish Academy of Sciences, Stockholm (2003); Foreign Member, Royal Academy of Belgium, Brussels (2003).

Summary of scientific research

Current research is devoted to dynamical chemistry and biology, with a focus on the physics of elementary processes in complex systems. In the Laboratory for Molecular Sciences (LMS) Center, collaborative multidisciplinary research has been established to address the role of complexity in the primary function of real systems including enzyme catalysis, protein-RNA transcription, electron transport in DNA, and the role of water in protein and DNA recognitions. A major research frontier at LMS is the new development of ultrafast diffraction techniques that make possible the imaging of transient structures in space and time with atomic-scale resolution. A significant effort is also devoted to giving public lectures to enhance awareness of the value of knowledge gained from fundamental research, and helping the population of developing countries through the promotion of science and technology for the betterment of society.
