

The Effects of Ionizing Radiation in Man

On 11-14 November 1975, a pivotal conference was held at the Academy's headquarters, focusing on "The Effects of Ionizing Radiation in Man". This issue, of paramount significance due to the global demand for nuclear energy and the imperative to safeguard human life, was deliberated under the guidance of Professor Carlos Chagas. The discussion involved scientists from various countries and was ethically overseen by Reverend Father Giovanni Visser.
